Alvin Edward Lewis : Biostatistics before purchasing it in order to gage whether or not it would be worth my time, and all praised Biostatistics:

A self-teaching guide to all the statistical procedures used in all medical disciplines Offering broad coverage of all the statistical procedures used in all medical disciplines, this book is the ideal course companion and self-study tool. This easy-to-use guide clearly shows how to use counts and measurements to carry out description, comparison, correlation, and prediction in the biomedical field, and how to evaluate data accordingly. The book uses practical medical examples to improve students grasp of biostatistical analyses and features end-of-chapter quizzes and a final exam to test knowledge.

About the AuthorAlvin E. Lewis, M.D., is a former professor with the Department of Pathology at Michigan State University, professor and chairman of the Department of Pathology at University of South Alabama, and was affiliated with the Department of Pathology at the University of California at Davis.
