"The authors and editors have taken pains to make the text clinician-friendly...The page layout is pleasing to the eye and easy to use." - JAMA, review of the last edition "This is a 'must have' book for any serious student of clinical immunology...Certain highlights stand out for me: the use of line diagrams to supplement histological photographs is excellent- to provide clarity to the features that are being demonstrated...overall, this book is very readable and user friendly, despite the size, and I learnt a lot. I heartily recommend this book." ed by: Dr Andy Gennery on behalf of the British Journal of Immunology, December 2013
