0 of 0 people found the following review helpful. For any ages! By E. Mills Middle aged husband had much fun planning new inventions!

Make Volume 34 takes to the sky, land, and the sea with projects and articles about underwater robots, incredible kites, and easy-to-make robots that are packed with personality. You'll also find features on an ancient and unusual

maker material, and an excerpt from Encyclopedia of Electronic Components, a follow-up title to Charles Platt's best-selling book *Make: Electronics*. You'll get great projects like CoffeeBots (Arduino-controlled coffee can robots), GlueMotor (control your own robots with an iPhone app), AudioBooks (amplified speakers that look like hardbound books), and KAPstan (a kite winch that makes winding kite line a breeze).

About the Author Mark Frauenfelder is a writer and illustrator living in Los Angeles, and the editor of *MAKE*. He is the cofounder of the popular Boing Boing weblog and was an editor at *Wired* from 1993-1998.
