Robert W. Bauman Ph.D. : Microbiology with Diseases by Taxonomy Plus MasteringMicrobiology with eText -- Access Card Package (4th Edition) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Microbiology with Diseases by Taxonomy Plus MasteringMicrobiology with eText -- Access Card Package (4th Edition):

1 of 1 people found the following review helpful. unnecessary except for the masteringBy Savannah HulsoppleThe book itself is written in a very basic way, not the most helpful for college classes. The mastering microbiology that comes with it though is beyond worth it and is worth 5 stars on its own. It has an animation clearly explaining every single concept you can imagine with quizzes and study tools. Also a little word to the wise, if you're a college student looking for a cheap book and there's a mastering included in it, just get the mastering, it includes a free digital copy of the book (another reason mastering is so fantastic)0 of 0 people found the following review helpful. 6 STARBy

CustomerJust the type of book I was looking to find. It has a fluent layout of topics. It even has pronunciations which makes it a SIX star to me.I purchased the paperback version because I wasn't sure if I would like it enough to invest in the hardback (Indeed hardback worthy!).FYI the paper is not the strongest, cover included. If you're a student and don't plan to use the book for long, buy paperback.1 of 1 people found the following review helpful. Great text. Fun read for class.By MaryGreat book for class. Was a required text but was simple and easy to read. The set came with a textbook, mastering microbiology online package that comes with subscription to the homework and an e-text, and two magazines about microbiology. I would have opted for a cheaper version if my professor hadn't requested this one. The irony is, the professor that specifically wanted this version actually dropped out from teaching the class due to health reasons last minute and this specific package became excessive. However, I had bought this package three months in advance to the summer class I was taking (back in March). Therefore, the extra two magazines added in with this package became unnecessary. Check with your professor before you purchase this set if you want to save money. (Some student in class just purchased the mastering microbiology set that came with e-text and homework access. This is most likely the cheapest option.)

ALERT: Before you purchase, check with your instructor or review your course syllabus to ensure that you select the correct ISBN. Several versions of Pearson's MyLab Mastering products exist for each title, including customized versions for individual schools, and registrations are not transferable. In addition, you may need a CourseID, provided by your instructor, to register for and use Pearson's MyLab Mastering products. Packages Access codes for Pearson's MyLab Mastering products may not be included when purchasing or renting from companies other than Pearson; check with the seller before completing your purchase. Used or rental books If you rent or purchase a used book with an access code, the access code may have been redeemed previously and you may have to purchase a new access code. Access codes Access codes that are purchased from sellers other than Pearson carry a higher risk of being either the wrong ISBN or a previously redeemed code. Check with the seller prior to purchase. -- The Fourth Edition of Microbiology with Diseases by Taxonomy is the most cutting-edge microbiology book available, offering unparalleled currency, accuracy, and assessment. The state-of-the-art approach begins with 18 Video Tutors covering key concepts in microbiology. QR codes in the textbook enable students to use their smartphone or tablet to instantly watch the Video Tutors. The approach continues with compelling clinical case studies and emerging disease case studies. Student comprehension is ensured with end-of-chapter practice that encompasses both visual and conceptual understanding. This edition retains the hallmark art program and clear writing style that have made Dr. Robert W. Bauman's book a success. 0321815564 / 9780321815569 Microbiology with Diseases by Taxonomy Plus MasteringMicrobiology -- Access Card Package Package consists of: 0321819314 / 9780321819314 Microbiology with Diseases by Taxonomy 0321861817 / 9780321861818 MasteringMicrobiology with Pearson eText -- Access Card -- for Microbiology with Diseases by Taxonomy

About the Author Robert W. Bauman holds a Ph.D. in Biology from Stanford University, an M.A. in Botany from the University of Texas at Austin, and a B.A. in Biology from the University of Texas at Austin. He is a tenured, full professor of biology in the Department of Mathematics, Sciences, and Engineering at Amarillo College in Amarillo, Texas, where he previously served as chairman of the Department of Biological Sciences. He has been teaching microbiology, botany, and human anatomy and physiology since 1988. In 2004, the students of Amarillo College selected Dr. Bauman as the recipient of the John. F. Mead Faculty Excellence Award. His research interests have included the morphology, ecology, and culturing of freshwater algae and photosynthetic protists, the cell biology of marine algae (particularly the deposition of cell walls and intercellular communication), and environmentally triggered chromogenesis in butterflies. His dissertation research at Stanford was on intercellular communication and cell growth in red algae at the Hopkins Marine Station. Robert Bauman is the author of another microbiology textbook at Pearson, Microbiology with Diseases by Body System, 3/e (copyright 2012). He is an active member of the American Society of Microbiology (ASM), serving as chairman of the Education Section from 2012-2013, and of the Texas Community College Teachers Association (TCCTA). In 2007, Dr. Bauman initiated an endowment at ASM to fund an annual travel grant for new instructors of microbiology to participate in the ASM Conference for Undergraduate Educators. Clinical Consultant Cecily D. Cosby, is a professor of nursing, currently teaching at Samuel Merritt College in Oakland, California, and has been in clinical practice since 1980, most recently at the University of California, San Francisco, in a pre-operative practice. She received her Ph.D. and MS from the University of California, San Francisco, her BSN from California State University, Long Beach, and her PA (Physician Assistant) certificate from the Stanford Primary Care Program.
