**Anne Dachel : The Big Autism Cover-Up: How and Why the Media Is Lying to the American Public** before purchasing it in order to gage whether or not it would be worth my time, and all praised The Big Autism Cover-Up: How and Why the Media Is Lying to the American Public:

16 of 17 people found the following review helpful. you'll easily see that the growth is exponentialBy Stephanie SeneffThis book is a must-read for anyone who believes that the autism epidemic is just because they're diagnosing it

more. It's long past time for the government to face up to the fact that we have a big problem. If you plot the CDC's own numbers on autism rates going back to 1975, you'll easily see that the growth is exponential. Extending the line will get you to 2032 with half the kids born that year being diagnosed on the autism spectrum. There is no doubt that our country will no longer be great when that happens. Many mothers of children with autism feel certain that their child's problems started with a visit to the doctor when multiple vaccines were administered. With aluminum, mercury, glutamate, formaldehyde, human DNA, etc., on top of the antigen, how can anyone think that vaccines would never cause harm? The government ought to be pouring enormous funds into studying a possible link between autism and vaccines. Instead, they are pretending that there is no problem and assuring us all that "anti-vacciners" are anti-science conspiracy theorists. It's time for people to wake up and face the truth! Anne Dachel is a hero for exposing the truth about autism. 40 of 45 people found the following review helpful. A Cover-Up like you've Never Seen Before By Maurine Meleck Finally there's a book about the failure of journalists to actually be journalists and write the truth about autism. We have been reading lies about the autism epidemic for two decades now. Anne Dachel's book digs into the "dirty lies" about this huge epidemic that's destroying the lives of a generation of children, boys in particular. You will read about dozens of writers and television personalities who have kept this deception going consistently as a fine-tuned automobile. They are completely influenced by government health agencies and doctors who are in turn influenced by big drug companies to hold the truth about autism under water until drowning is inevitable. They want you to believe that autism isn't so bad, that the 1 in 68 children now diagnosed with an autism spectrum disorder is simply due to better diagnosing, and most importantly that America's present vaccine schedule is safe as a security system on your home. At the same time, these false writers and reporters will tell you that these people who worry about vaccine safety are crazy as rabid dogs and deserve no attention, even though they are some of the most highly educated people in the country. Well, Ms. Dachel, with her fine writing skills and experience with autism advocacy for over a decade, will lay the truth out for you with live journalistic integrity like you've never seen before. This book is a must for anyone who has questions about the autism epidemic, the honesty of today's journalism, and why the media is covering it all up in a blanket of secrecy. 30 of 34 people found the following review helpful. Excellent Expose of How the Media Is Guilty in Continuing and Exacerbating the Autism Epidemic By Laura Hayes Wow...to have the media's astounding, decade-and-a-half-long cover-up of the raging Autism Epidemic (that's erring on the side of underestimating it) documented in exhaustive detail is nothing short of a tremendous accomplishment by excellent writer, Anne Dachel. Anne Dachel has helped to ensure that there will always be a meticulously-detailed, nationwide account of how the media aided and abetted the heinous crimes against humanity committed by the evil and corrupt pharmaceutical-governmental-medical triumvirate that have resulted in harming, disabling, making chronically ill, and sometimes killing, 2 1/2 decades-worth (and counting) of children. Blood is on the media's hands just as surely as it is on the hands of fraudulent vaccine researchers, corrupt government regulators, moral-less pharmaceutical company executives, arrogant and willfully-ignorant doctors and nurses who have completely abandoned their oaths to "First, do no harm," and corrupt elected officials who have chosen to be unethically beholden to the Big Pharma companies who helped get them elected with the express purpose of doing their bidding. As a parent of vaccine-injured children (the most serious of whom is part of the initial wave of the Autism Epidemic, at age almost 21), I am extremely grateful for Anne's tireless, dogged pursuit and documentation of how the media, which is supposed to benefit the public by reporting the truth, has done anything and everything but report the truth when it comes to the raging Autism Epidemic and its more-than-obvious link to the sacred cow of medicine, vaccines. Anne's book is a must-read for everybody, and it serves as a warning that the mainstream media cannot be trusted to report anything with accuracy or ethics. They have been bought and paid for, and their reporting exposes by whom.

An unflinching look at the truth behind the media's lies about autism. Autism now affects two percent of U.S. children. A once rare disorder is now so common that everyone knows someone with an affected child. Yet neither mainstream doctors nor government officials can tell the American public what is behind the staggering rise in diagnoses. The Big Autism Cover-Up explores how news outlets downplay the impact of autism while backing the official denial of any link between the disorder and vaccines. Despite never honestly and thoroughly investigating the link, mainstream news sources continue to challenge those who question the safety of vaccines and the mounting evidence that an unchecked, unsafe vaccination schedule is behind the exponential increase in autism. Anne Dachel has spent the last ten years monitoring how the press covers autism. She's seen the media promote the unrelenting message from health officials that autism hasn't really increased, that it is simply a matter of better diagnosing of a disorder that's always been around. Meanwhile, autism remains a perpetual mystery and scientists continue to guess at the genetic and environmental triggers. Officially there is no known cause or cure for autism. There's nothing a new mother can do to prevent a baby that was born healthy and is developing normally from regressing into autism by the age of two. Despite this, officials rarely express concern and adamantly refuse to call autism a crisis. The Big Autism Cover-Up exposes this controversy in searing detail.

Perhaps with the best of intentions there has been, nonetheless, longstanding misreporting and misunderstanding of the

documented facts regarding vaccine side effects, including the autism links. When history eventually tells the whole story, it will undoubtedly rank as one of the biggest health and news media scandals of our time. Sharyl Attkisson, former CBS investigative reporter, author of *Stonewalled: My Fight for Truth against the Forces of Obstruction, Intimidation, and Harassment in Obamas Washington* A comprehensive analysis, through the words of many different experts and advocates, revealing the unconscionable cover-up of the worst medical disaster in human history: the creation of an epidemic of autism and other disorders through overvaccination. Dachel has put all the disparate facts, events, and experts in a single book, a must-read for any parent concerned about the health of our children. J. B. Handley, cofounder of Generation Rescue Every movement has its heroes. Anne Dachel is the Rosa Parks of vaccine-induced autism. If I had a dollar for every comment Anne Dachel has placed at the end of each misinformed news story on the vaccine/autism issue, I would be able to fund the kind of transparent and independent vaccine safety research this book so strongly calls for. Alison MacNeil, cofounder of Thinking Moms Revolution "Anne Dachel has reviewed the media coverage of the growing epidemic of neurologically impaired children (ADD, ADHD, autism, etc.). She outlines the media bias in any study or report that vaccines may be behind many of these serious problems. She endlessly points out that hundreds of individuals at the CDC have conflicts of interest because they have financial ties to the vaccine makers. . . . Her message is very clear, do not vaccinate before you educate yourself on the vaccine issues." Mayer Eisenstein, MD, JD, MPH I would encourage all citizens concerned with the health of Americas children to read Anne Dachels book Boyd E. Haley, PhD, professor emeritus in chemistry at the University of Kentucky
