J. Playfair McMurrich : The Development of the Human Body; Manual of Human Embryology (Classic Reprint) before purchasing it in order to gage whether or not it would be worth my time, and all praised The Development of the Human Body; Manual of Human Embryology (Classic Reprint):

The interest in human and mammalian embryology which has characterized recent years has resulted in many additions to our knowledge of these branches of science, and has necessitated not a few corrections of ideas formerly held. In this seventh edition of this book, as in previous ones, the attempt has been made to incorporate the results of all important recent contributions upon the topics discussed, and at the same time, to avoid any considerable increase in the bulk of the volume. The subject matter has therefore been thoroughly revised throughout, so that it is hoped that the book forms an accurate statement of our present knowledge of the development of the human body. In addition to the works mentioned in the preface to the first edition as of special value to the student of Embryology, mention should be made of the *Handbuch der vergleichenden und experimentellen Entwicklungslehre der Wirbeltiere* edited by Professor Oscar Hertwig and especially of the *Manual of Human Embryology* edited by Professors F. Keibel and F. P. Mall. UNIVERSITY OF TORONTO. (Typographical errors above are due to OCR software and don't occur in the book.) About the Publisher Forgotten Books is a publisher of historical writings, such as: Philosophy, Classics, Science, Religion, History, Folklore and Mythology. Forgotten Books' Classic Reprint Series utilizes the latest technology to regenerate facsimiles of historically important writings. Careful attention has been made to accurately preserve the original format of each page whilst digitally enhancing the aged text. Read books online for free at www.forgottenbooks.org
