Earl J. Brown : The Embryology, Anatomy and Histology of the Eye before purchasing it in order to gage whether or not it would be worth my time, and all praised The Embryology, Anatomy and Histology of the Eye:

0 of 0 people found the following review helpful. The embryology Anatomy and Histology of the eyeBy ma_nurseThe paperback 2010 reprint does not contain any of the figures in the book. This makes the book essentially worthless to the reader because more than 70 different figures are mentioned in the book.

This book was originally published prior to 1923, and represents a reproduction of an important historical work, maintaining the same format as the original work. While some publishers have opted to apply OCR (optical character recognition) technology to the process, we believe this leads to sub-optimal results (frequent typographical errors, strange characters and confusing formatting) and does not adequately preserve the historical character of the original

artifact. We believe this work is culturally important in its original archival form. While we strive to adequately clean and digitally enhance the original work, there are occasionally instances where imperfections such as blurred or missing pages, poor pictures or errant marks may have been introduced due to either the quality of the original work or the scanning process itself. Despite these occasional imperfections, we have brought it back into print as part of our ongoing global book preservation commitment, providing customers with access to the best possible historical reprints. We appreciate your understanding of these occasional imperfections, and sincerely hope you enjoy seeing the book in a format as close as possible to that intended by the original publisher.

About the Author Earl J. Brown, MD is Associate Professor in the Department of Pathology at Quillen College of Medicine in Johnson City, Tennessee.
