Flash Anatomy : The Muscular System (Flash Paks/Volumes 1 and 2) before purchasing it in order to gage whether or not it would be worth my time, and all praised The Muscular System (Flash Paks/Volumes 1 and 2):

0 of 0 people found the following review helpful. not real "flash" cards if the picture and its information are on different pagesBy mking98Be careful when buying these. Make sure you know these aren't separate cards, they're in a ring binder. However, the name and description of the muscle is on the page opposite the picture, which makes it difficult to separate out from the binder to study from and "self-quiz". It'd be much better if the information was on the same card as the picture, on the back of the card. Unless I got a defective pack or something.14 of 14 people found the following review helpful. A must for STOTT Pilates CertificationBy Black CatIf you are pursuing certification in STOTT Pilates, you must buy these flash cards. The muscle images on the written exam are directly from this pack. Even if you know your muscles, you need to know how they are depicted in these flash cards so you can instantly recognize them on the test. For instance, the deltoids are shown from a superior view. This can look totally foreign if you are not used to this view.0 of 0 people found the following review helpful. Very useful toolBy CustomerThe outer box was slightly damaged when I received it, despite being new rather than second hand. However, it has all the

information I need laid out in a clear and concise manner so it doesn't matter all that much to me.

The MUSCULAR SYSTEM flash paks illustrate every functional muscle in the human body from the shoulder girdle down; denoting the origin, insertion, action, innervation, and synergists for each muscle. This spiral-bound reference tool features two-color illustrations, terminology, and definitions contained in a 2 volume set, individually grouping the upper and lower extremities. The MUSCULAR SYSTEM flash paks are a proven study aid for both medical and massage therapy students as well as professionals. They are commonly used for such programs as Medical, Pre-Med, Nursing, Physical Therapy, Occupational Therapy, Kinesiology, Chiropractic, EMT, Mortuary Science, and Massage Therapy.

From the Publisher Other recommended titles offered in flash pak format include: SKELETAL SYSTEM and THE MUSCLES OF THE HEAD NECK
