**Eleanora McBean : The poisoned needle: Supressed facts about vaccination** before purchasing it in order to gage whether or not it would be worth my time, and all praised The poisoned needle: Supressed facts about vaccination:

5 of 5 people found the following review helpful. ... this book forty years ago and it is a good view of the vaccine questioning movement that has been ...By malka monroeI read this book forty years ago and it is a good view of the vaccine questioning movement that has been ignored so long and is so prevalent today.6 of 6 people found the following review helpful. Thank you for carrying this very important book - ...By SarahThank you for carrying this very important book - it should be required reading for all expectant mothers, husbands, grandmothers ANDdoctors/nurses.29 of 33 people found the following review helpful. The Poison NeedleBy Paul F. VincentThe first two reviewers are ignorant and suffer from cognitive dissonance and have been ravaged by the effects of the Hegelian Dialectic. Not to mention that their perspectives are based on feelings rather than reason. How man polio cases were there last year in the U.S.? All of them came from the vaccine. Yes, all 79 came from the vaccine. What was the cost of the vaccine to you and I? 50 million vaccinations at \$25 each equates to \$1.25 billion in revenue each year. If 100 people came down with polio it would not cost a billion dollars to treat them. Then there are the contraindications of the various inoculations that cause much concern. Autism was unheard of until vaccines became popularized. Find a native population in the southern hemisphere that has never been inoculated an you will find autism has never raised its ugly head there. If so far you find what has been stated to be ludicrous then why is it that 9 out of every 10 pediatricians NEVER vaccinate their children?This book is on the mark and has been kept out of

circulation for far too long. Who do you trust more big pharma or holistic medicine? The choice is yours and so is the effects of what you put in your body. Inoculate for small-pox Inoculate for mumps; Inoculate for typhoid For colds and nervous slumps; Inoculate with cow pus And germs of every brand Inoculate with monkey glands To make us young again. But one fine day the laity Will move in self-defence To inoculate the doctors With a little common sense.--by a medical student, Winnipeg, Canada

This infusion of poison into the masses only serves to intensify the disease in some cases, suppress the symptoms in others, and create new and more serious disease. Eleanor McBean has accumulated compelling evidence regarding vaccination and the reasons why we should say no to the dangerous infusions.
