I'm an assiduous step-1 studier and I own pretty much every resource from FA, BRS, Goljan, QBooks, QBanks, Microcards, Lange pharm cards, many of the HYs and many of the DejaReviews. Underground Clinical Vignettes - Anatomy was FANTASTIC. It's an incredibly affable read and takes about 5 hours to finish (~10 to appreciate). It covers the CLINICALLY relevant anatomy that shows up on the exam. For example, a lump over the buttocks in a new born -- petit triangle hernia, then it gives you the boundaries (iliac crest inferiorly, anterior aspect of latissimus dorsi posteriorly and posterior aspect of external oblique muscle anteriorly). And that's just one example. The USMLE is all vignettes, and people who score well do so because they know key words and things to look for, not just because they have mere shelf knowledge. I believe this book will have earned me at least 3 or 4 additional points on the exam. Read it once, then before the exam, give it another half hour review -- twice total.0 of 0 people found the following review helpful. Really nice and to the pointBy schoolbelleI decided to give this a really high rating because I felt it was to the point, helpful, and really efficient. I used this to study for my shelf exam and this was extremely helpful. I plan on using this for step 1 once the time comes.

Completely revised by new authors, this Fifth Edition presents 100 patient cases designed specifically to prepare students for clinical vignettes on the USMLE Step 1. Each case proceeds from chief complaint through diagnostic workup and treatment and includes buzzwords in history taking, physical examination, laboratory tests, imaging, and pathology. This edition's cases give greater emphasis to pathogenesis, epidemiology, differential diagnosis, management, and complications and include radiologic images, photographs, tables, and algorithms. A new two-page format encourages students to read the case presentation and formulate an initial diagnosis before turning the page for the answer. The book ends with twenty all-new board-format questions and answers.
