Gary Matsumoto : Vaccine A: The Covert Government Experiment That's Killing Our Soldiers--and Why GI's Are Only the First Victims before purchasing it in order to gage whether or not it would be worth my time, and all praised Vaccine A: The Covert Government Experiment That's Killing Our Soldiers--and Why GI's Are Only the First Victims:

2 of 2 people found the following review helpful. Valuable research available to all who are not afraid to live life with eyes open. By rogue This book is valuable research available to all who are not afraid to live life with eyes open. I have a science background and find the information laid out in this book to be completely thoroughly researched and definitely plausible. The ordinary citizen has a perspective of our government officials, military complex and science related ventures that is completely inaccurate. Individuals in these positions are still and foremost humans. Humans make mistakes, have agendas, ignore data in favor of what they want even in the face of disaster and harm to others. Anyone who has family in either the military, science or politics fully realizes this book is factual. My only qualm is that the vendor I purchased it from charged me for double the order that I received. I do not yet know how to get my money back from this vendor, but the book is invaluable to anyone who is awake and desires to educate family and friends for their own peace of mind. 0 of 0 people found the following review helpful. Confusing is a vast understatement. By Whatever Three stars is about two too many but just because the book is bogged down, submerged no drowned in medical language I'll still acknowledge the Author's dry angle of meticulously transporting the reader down the rabbit hole of military voodoo. 1 of 1 people found the following review helpful. Anyone who has Ever Received A Vaccine of any sort. This is AMUST READ!!! By COLTOJ If you think it's confined to the military, think again. Any healthcare worker required to get flu shots needs to read this. Anyone who owns a pet who gets shots, needs to read this. One of the most important books ever published. Even more shocking is that this is written of in the scriptures as happening in these days.

In this provocative look at the US military from the Persian Gulf War through the 2003 invasion of Iraq, investigative journalist Gary Matsumoto contends that an anthrax vaccine dispensed by the Department of Defense was the cause of Gulf War Syndrome and the origins of a massive cover-up. Matsumoto calls it the worst friendly-fire incident in military history. A skillfully-woven narrative that serves as a warning about this man-made epidemic, Vaccine A is a much needed account of just what went wrong, and why.

About the Author Gary Matsumoto has reported from thirty-two different countries and has won ten journalism awards. His 1999 article in Vanity Fair was the first to draw the connection between the vaccine and Gulf War Syndrome. Matsumoto is based in New York City.
